

Steel Strap Cutter Sliding Striker Type

Specification:

| Item No. | Length(mm) | Weight(kg) | Replacement blade |
|-----------|------------|------------|-------------------|
| SS 450-SS | 520→565 | 1.8 | SSC 450 |

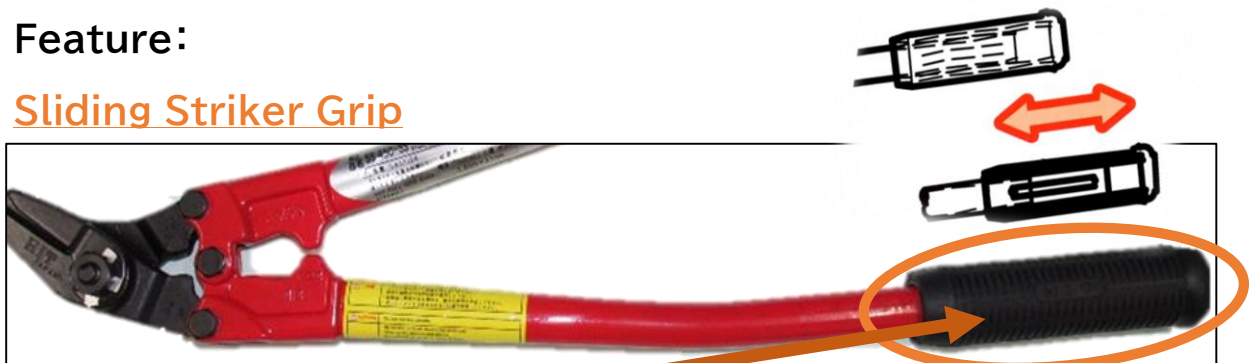

*When the sliding striker grip is pulled out to the end, the total length will be 565mm.

Capacity:

steel strap: up to thickness 1.2mm×width 51mm

Feature:

Sliding Striker Grip

This part is moveable.

By pulling out and pushing this grip, this can provide impact to put the blade between the steel strap and object.

How to use Sliding Striker Grip

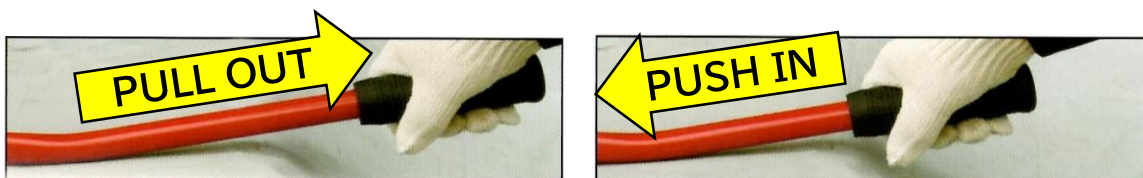

Sample video of HIT Steel Strap Cutter (Sliding Strike Type):

<https://www.youtube.com/watch?v=hNDKfH3dPT4>

The cutter in this video and the example below is SS 600-SS.

In this situation, it's difficult to insert the blade between steel strap and metal pipes.

By pulling out the sliding striker grip to the end, then push it strongly. The force will push the blade forward.
